

Ally Moodle Plugin Repository Location Change

Date Published: May 10,2023 **Category:** Product:Ally_BU; Version:Ally_BU **Article No.:** 000077608

Product: Ally

Information:

As part of our ongoing efforts towards supporting our customers using the Ally Moodle plugins as part of a Moodle or OpenLMS Ally integration, we're announcing a new plugin repository location to continue facilitating the download and installation of the three main Ally plugins below for OpenLMS and self-hosted Moodle customers:

- Ally admin tools
- Ally filter
- Ally report LTI

You can find links to the new repository and plugins in the table below:

Table with the ally for moodly gitHub URLs:

PLUGIN	NEW GitHub Repository
Ally Admin Tools	https://github.com/anthology-ally/moodle-tool_ally
Ally Filter	https://github.com/anthology-ally/moodle-filter_ally
Ally report LTI	https://github.com/anthology-ally/moodle-report_allylti

NOTE: if you were using the previous repositories' URL, you will be automatically redirected to the new repositories.

Existing Ally for Moodle clients are NOT affected by this migration and the current version (v4.0.5) of the Ally plugins will continue working normally as expected.

The new repositories contain the exact same files and information that was previously published.

This change does not change any of the functionality of the Ally plugins. Any new plugin version availability will be announced and added to these new repositories as the plugins are developed.

OpenLMS: Ally plugins will continue to be part of the [OpenLMS plugin matrix](#).

Self-hosted: Ally plugins will continue to be listed as part of the core Moodle plugin matrix.

- [Ally filter and report](#)
- [Admin tools](#)
