Product: Blackboard Learn

Release: 9.1;SaaS

Service Pack(s): Learn 9.1, 3900.19.0, Learn 9.1, 3900.21.0, Learn 9.1, 3900.23.0, Learn 9.1, 3900.26.0, Learn 9.1, 3900.28.0, Learn 9.1, 3900.30.0, SaaS

Description: When moving Branding to Private DocStore it does not remove the Legacy Files permitting them to be recopied in perpetuity.

Steps to Replicate: The following steps simulate the creation of a legacy theme. It is no longer possible to create a legacy theme.

1. Log into **Blackboard Learn** as an Administrator
2. Navigate to **System admin** > **brands and themes** > **Theme and Palette Catalog**
3. Download the stock "Bb Learn 2016" theme
4. Create a New theme
5. Re-upload theme with name & ext-ref "new_theme"
6. Go to **System admin** > **Manage Content** > /internal/branding/themes download the folder new_theme as a ZIP
7. Delete the folder
8. Upload the ZIP file to the Appserver and unzip it under the correct directory — creating the parent directory if needed.
9. Restart Tomcat via `ServiceController` several times

Observed Behavior:
It is copied to "/internal/branding." But: It is never removed from the legacy folder.

Note: since the directory is not removed, each time Tomcat is restarted it copies it anew.

Expected Behavior:

The branding folder is *moved* to the Xythos "/internal/branding" area — IE it is deleted from the legacy VI folder. Subsequent restarts do not undertake to migrate.

Target Release: Learn 9.1, 3900.46.0 Release

SaaS - Fixed (v3900.46.0)
