Detalles del anuncio:

Blackboard is pleased to announce the availability of Cumulative Update 3 for Learn 9.1, Q4 2016 Release (Build: 3100.0.3-rel.51+917ccd3).

In February 2017, a hotfix was released to SaaS clients on the Flexible Deployment Option using the build number 3100.0.2. Due to our internal code branching process, this release was built using the next sequential number 3100.0.3. To stay consistent between the final digit of the build number and the Cumulative Update version, this release has been named Cumulative Update 3.

All Cumulative Updates for 9.1 Q4 2016 will be using the installer instead of the BbPatch Utility. Please review this entire bulletin for important details regarding installation instructions and contents of this Cumulative Update.
