About the Jones & Bartlett Learning Partner Cloud Integration

Instructors have asked for increased compatibility between Blackboard™ courses and the Navigate 2.0 platform. To meet this request, JBL and Blackboard have worked together to integrate JBL within the Blackboard Partner Cloud to provide the following features:

- One-time course pairing between a Bb course and Navigate 2.0 course.
- One-time account pairing for students and instructors between systems and SSO upon subsequent visits.
- Instructors can add a link to the related Navigate 2 course home page into any Content Area of their Blackboard Learn course, allowing students direct access to their Navigate 2 course(s).
- Grade synchronization – As students complete assignments in the Navigate 2 environment, a final grade will appear in the related Blackboard Learn course's Grade Center and be updated automatically.
