Product: Blackboard Learn

Information:
Blackboard is pleased to announce the release of Genius 1.11 as part of our Blackboard Registration & Management solution.

What is it?

Blackboard Registration & Management is a web-based management system and registration portal that offers customers fully integrated learner registration, enrollment management, e-commerce capabilities, a manager dashboard and enterprise reporting tools that each client can customize to meet their needs.

The integration with our partner, Genius, provides Blackboard's clients a complete training management solution:

- Allows corporations, government agencies, associations and other professional organizations to manage the full lifecycle of learning
- Gives learners more control as they navigate their training with individualized learning paths
- Administrators and Trainers can easily see their students' progress toward certifications and view each learner's full course history
- Training environment can also be used as a revenue source through integrated e-commerce capabilities
