

Blackboard®

All Answers Option in Original Course View Assessment Persists after Course Copy into an Ultra Course and Overrides the Unchecked Show Correct Answers Option

Date Published: Jul 15,2020 **Category:** Planned_First_Fix_Release:SaaS_v3800_13_0; Product:Course_Tools_Learn; Version:Ultra **Article No.:** 000059245

Product: Blackboard Learn

Release: SaaS

Service Pack(s): Ultra

Description: When a Test is setup with the "All Answers" option enabled in an Original Course and then copied into an Ultra Course, that setting remains in effect despite unchecking the "Show Correct Answers" option in the Ultra Test. This means that despite the "Show Correct Answers" option being unchecked in the Ultra Test, the Students may still see the correct answers to the questions in their submitted Attempts.

Steps to Replicate:

1. Log into Blackboard Learn (SaaS environment with Original and Ultra Course View) as System Administrator
2. Create a new Ultra View Course and an Original View Course
3. Enroll into both Courses as Instructor
4. Enroll a Student user into the Course
5. Navigate to the Original View Course > Create a new Test with at least one Multiple Choice question
6. **Deploy** Test to a Content Page with the settings to allow **Unlimited Attempts**
7. **Make Test Available** to Students and **Show Test Results and Feedback to Students, After Submission** and **All Answers**
 1. **Note:** If you take the Test now as a Student, they do not see the correct answers on Submit. Instead, the Student sees all the possible answers for that question.
8. Log in as System Administrator
9. Copy that Original Course to the Ultra Course created in Step 2
10. Navigate to **Settings** of deployed Test in Ultra Course
11. Verify that **Show Correct Answers** is not enabled
 1. **Note:** If **Show Correct Answers** is enabled, turn it **Off** > **Submit**
12. Log in as Student
13. Navigate to the Ultra Course > Test
14. **Submit**

Expected Behavior:

The Correct Answer does not display to the user who submitted the Attempt, as the option for **Show Correct Answers** was not selected.

Observed Behavior:

The Correct Answer is highlighted despite the fact that the option for **Show Correct Answers**" was not selected.

Resolution/Workaround:

1. Go to the "Original View" options temporarily for the Test by hovering over the Test itself and the Course to get the content and course pk1s and plug them into a URL like (swapping <hostname> and pk1s as appropriate):
 1. https://<hostname>/webapps/assessment/do/content/assessment?action=MODIFY&course_id=_1682_1&content_id=_34662_1&assessmentType=Test&method=
 2. Note: In the above example it is course pk1 = 1682 and content (Test) pk1 = 34662
2. Visit that URL in the same browser in another tab
 1. **Note: All Answers** is still checked
3. Uncheck **All Answers** > **Submit**
4. Take the Test again as the Preview user
5. Review the new Attempt and note that the correct answer no longer displays and respects the unchecked **Show Correct Answers**" option set in the Ultra Test options

Target Release: SaaS - Fixed (v3800.12.0)

Patch Available: No
