**Description:** When a user clicks on the Tool Name of an LTI 1.3 Tool, a new window opens to a non- valid FQDN.

### Steps to Replicate:

1. Log into **Blackboard Learn** as an administrator
2. Navigate to the Administrator Panel
3. Under **Integrations** click on LTI Tool Providers
4. Edit paging > **Show All**, to see all of the registered Tools.
5. Click on an LTI 1.1 Tool Fully Qualified Domain in the far left column
6. As expected a new browser window opens to the integration
7. Click on the Tool Name of an LTI 1.3 Tool.

### Observed Behavior:

A new window opens to a non- valid FQDN.

### Expected Behavior:

LTI 1.3 tool is not a link.

### Cause:

- The system is trying to take the string that is the name of the Tool and convert that to a URL.
- This is not possible with LTI 1.3 names. The system should not present the LTI 1.3 Tool Name in a hyperlink.
