Product: Blackboard Learn

Description: There is a global concurrency limit for the execution of queued tasks in Blackboard Learn.

Symptoms: When multiple courses are submitted for copying via a particular method, only up to a certain number at a time runs per method. The two methods are SIS and GUI copying; for each the limit is 4.

Therefore: at maximum eight courses can be "running" a copy task at a given time: four GUI course copies and four SIS copies.

Information: There have been several changes to the values over time. As of publication the history of changes is:

Version	GUI Copy Concurrency Limit	SIS Copy Limit
Before 3700.11.0	2	2
Between 3700.11.0 and 3900.60.0	1	1
After 3900.60.0	4	4
