LTI 1.3 Assignment and Grades - Gradebook shows 0.99999 vs. a 1

Date Published: Sep 30,2022 **Category:** Planned_First_Fix_Release:SaaS_v3900_52_0,Learn_9_1_3900_52_0_Release; Product:Data_Management_and_Integrations_Learn; Version:X9_1,SaaS **Article No.:** 000076857

Product: Blackboard Learn

Release: 9.1;SaaS

Service Pack(s): 9.1, SaaS

Description: When the instructor places grade scores, Bb Learn calculates wrong the percentage scores sent by Cengage. So for example, if a student has 1 out of 3, Bb Learn will send 33.33333 out of 100. The expected behavior is that Bb Learn would rescale, leading to a 0.9999999 value. Since only 5 digits are displayed, the expected display value would then be 1.

Target Release: Learn 9.1, 3900.52.0 Release

SaaS - Fixed (v3900.52.0)
